
PDF The Estill Voice Model Theory And 54

True Vocal Fold: Onset/Offset

Explore

At the soccer game, your best friend almost falls!

You hold your breath and exclaim with a glottal pop: "**Ay, Olivia!**"

You run over to her. Out of breath, you whisper with an aspirate exhale: "**Hey, Olivia!**"

She stands up and kicks the winning goal! You smile with a smooth reply: "**Yay, Olivia!**"

What do you feel, hear, and see?

I'm Auggie Onset/Offset!

I start and stop sound of your true vocal folds.

When I hold my breath for **glottal**, my vocal folds close and the sound pops out or stops quickly. For **aspirate**, I let my breath go into a sigh at the beginning and end of my words. For **smooth**, my air and sound start or stop together.
